

ChemCoin

Corrosion Inhibiting Admixture

Description:- ChemCoin is a bipolar corrosion inhibiting admixture in liquid form for reinforced concrete and mortar. Provides excellent corrosion resistance property. Chem coin is widely used for increasing the passivation of reinforcement and is widely demanded in construction industry. It is uniformly mix in reinforcement concrete.

Charachractic Parameters:-

It conforms the requirements of IS 2645, IS 9103 and ASTM C 1582M.

Features/Advantages

- ❖ Easy to use and easy blending with water.
- ❖ Compatible with all types of cements as well as different admixtures.
- ❖ Environment friendly product.
- ❖ Free from sulphates & chlorides, non-hazardous.
- ❖ Corrosion resistant & highly impermeable.
- ❖ Reduce concrete permeability.
- ❖ Improve concrete consistency and compaction property.

Applications

- ❖ Used for steel reinforced concrete
- ❖ Used for pre- stressed and post tensioned concrete.
- ❖ Floor, columns and slabs.
- ❖ Parking areas, garages, bridge decks and marine structures.

Packing: - 200 kg

Shelf-Life and Storage Condition: - Shelf life is 12 months from the date of manufacturing if stored properly in undamaged and unopened original sealed drum. Keep in dry and cool place & temperature should be +10°C to + 30°C.
