

# ChemProof IWC (P)

## Powder Form Integral waterproofing Compound for Concrete, Mortar and Plaster

**Description:**-ChemProof IWC (P) powder is a fine, white powder ready to use with concrete or cement mortar mixes. ChemProof IWC (P) powder is a traditional admixture to fill natural pores within the concrete or mortar matrix to reduce porosity and improve water tightness.

### **Characteristic Parameters**

It conforms to specification prescribed in IS: 2645:2003.

### **Features/Advantages**

- ❖ Easy to use- Simple application familiar to site operations.
- ❖ High Quality - Traditional waterproofing material manufactured to latest standards.
- ❖ Workability - Improves workability.

### **Applications**

- ❖ Mortar - ChemProof IWC P powder is suitable for use with sand/ cement mortars where it is required to reduce permeability.
- ❖ It can also be used in external plastering of roof and balcony screeds, plastering of basements and tanks, external masonry walls.
- ❖ ChemProof IWC P powder is recommended for use with concrete mixes where it is required to reduce permeability.

**Packing:** - 5 and 25 kg. Moisture proof bag.

**Shelf-Life and Storage Condition:** - Shelf life is 12 months if store in a dry and cool place with unopened sealed moisture proof bags. If stored in high temperature and high humidity place, the shelf life may be reduced.
